

Trunk & Pelvic Walking Harness

NWH023

- Provides significant support, particularly around the trunk and pelvic areas due to its elasticsation
- Helps to improve standing tolerance, independent transfers and activities using natural patterns of movement
- Successfully used with children with athetoid cerebral palsy, acquired brain injury and those with ataxic movement
- Allows forward and backward movement for balance activities
- Suitable for rehabilitation purposes, therapy, working in prone positions and inclusion in school and family activities
- Suitable for hydrotherapy purposes
- Needs to be applied on a bed or changing table
- Comfort covers can be added to the straps
- Hand wash only
