

Swift® Slider

- A friction-reducing device that remains in-situ to assist with care receiver repositioning, boosting and turning in bed
- The Swift® In-Bed Repositioning System features two elements, the Swift® Slider and the UltraSlide® Bottom Sheet, which work together to support repositioning and turning manoeuvres in bed
- Swift® Slider with Handles - handles run inset down two lengths of slider and can be attached to a hoist if needed, offering multidirectional movement.
- All 3 sliders are suitable for both standard and bariatric application.

SIL-PTD-56/BA

Swift® Slider with Handles
